*Journey to Constant Growth and Teamwork*

*"THERE'S NO CHALLENGE MORE CHALLENGING THAN  
THE CHALLENGE TO IMPROVE ONESELF."*

For a Jordan Cachero, life is a constant chase for challenges. Jordan is a senior PHP developer at Flexisource IT for a loyalty rewards company in Australia. He graduated with a degree in BS Information Technology at Saint Louis University in Baguio City.

As an avid gaming enthusiast, Jordan grew up playing a variety of games which inspired him to seek a career related to games. Pursuing an IT course might have run in the blood since all his elder brothers are working in the IT industry. Having a career in tech may have been natural for him.

## JORDAN'S TOP 3 LIFE LESSONS:

Be kind. We don't know what other people are going through even if they appear fine.

Be positive. We could fail, but we'll learn and improve.

Be thankful to God for what you have.

# SEEKING CHALLENGES WITH FLEXISOURCE IT

Seeking challenges and adventures are what defines Jordan's life mantra. He loves to travel and explore various places in the country and try out new activities that can satisfy the adrenaline junkie in him.

Jordan's usual day at work starts with breakfast with his teammates. It's a great way to catch up with them and bond over food. After that, their team has standups so everyone is on the same page in their current sprint. He checks email and important messages, then he proceeds to do his coding tasks throughout the day.

When he has the chance, he helps out other teammates, especially junior developers in their tasks. He also reminds teammates about what was discussed when they forget about them. Despite some roadblocks, Jordan enjoys working with his team.

"I feel great with my team and I'm happy when I see them improving. For me, our communication is transparent and perfect. I like working with my team as well as how the management operates the company," he said.

With his two-year stay with Flexisource IT, he has created lasting memories that he considers the best moments throughout his stay.

He loved his team outing this year before the pandemic happened where they went to a team outing to bond with teammates.

Winning the first-ever Hackathon with his team, Team Ivana, and winning the 2019 Valentine event are also memorable for him.

In his career, Jordan shared that his stay at Flexisource IT has been the longest he has worked with.

**"Flexisource IT is now the company that I've worked for the longest, and maybe the only company that I'll be working with for more than 2 years. I want to recognise my teammate Dexter Campos. He's the team lead that actually helped me learn and grow in all companies I've worked with," Jordan said.**
